

a

A shared plant-cell representation
spans eight evaluation species

A. thaliana C. roseus F. vesca G. hirsutum
 B. rapa E. salsugineum G. bickii T. aestivum

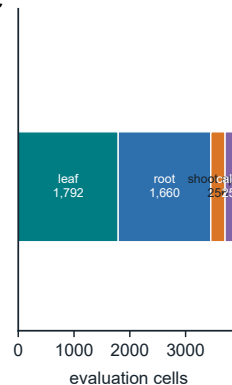

b

Cell-state topology is visible
across the same coordinates

Input organs are explicitly
represented

c

The traceable corpus exceeds
the strict panel

d

272,732 cells; 209,405 genes
