

a A label-free external root matrix resolves into structured predicted states

GSE152766/GSM4626007: 6,566 cells; not listed in the frozen v4 corpus profile

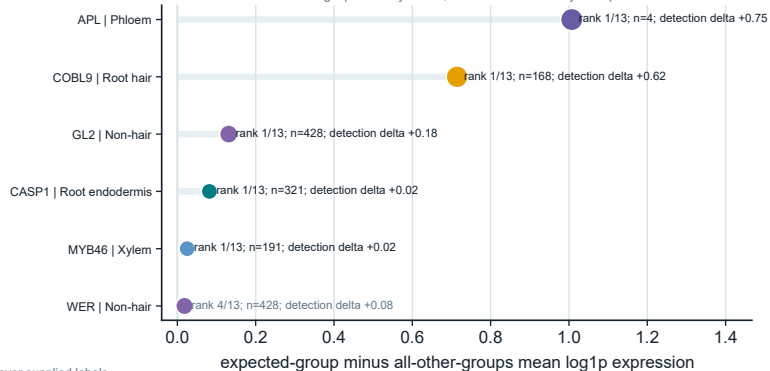

b All 13 output states and confidences remain inspectable

Numbers are predicted cells, not an external ground truth

c Five of six fixed literature anchors peak in their expected predicted group

Marker coherence is a biologic plausibility check, not external accuracy or experimental validation

Coordinates derive from frozen 256-dimensional model embeddings. Colours are model outputs, never supplied labels.
