

a Wheat stress-test provenance

224 historical strict-set barcodes removed before splitting

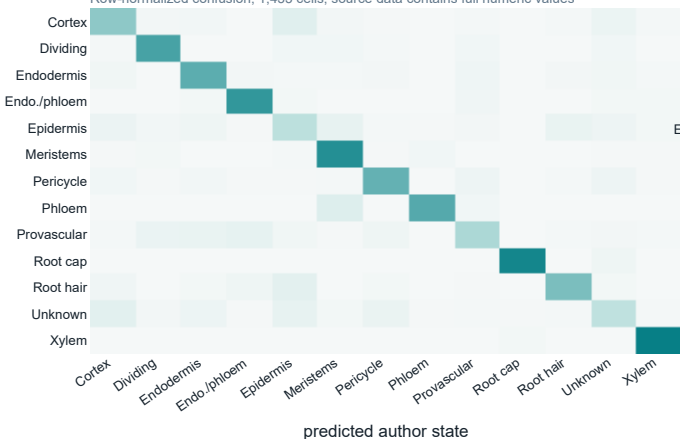

b Mapping retention

Deterministic first-target map is disclosed

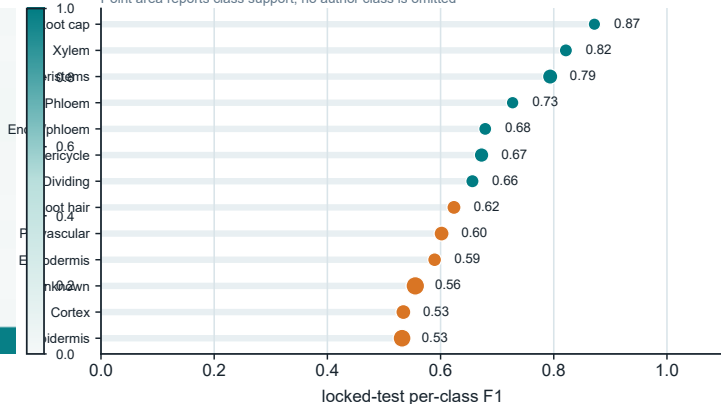

d The 13-class locked test preserves each author state

Row-normalized confusion; 1,433 cells; source data contains full numeric values

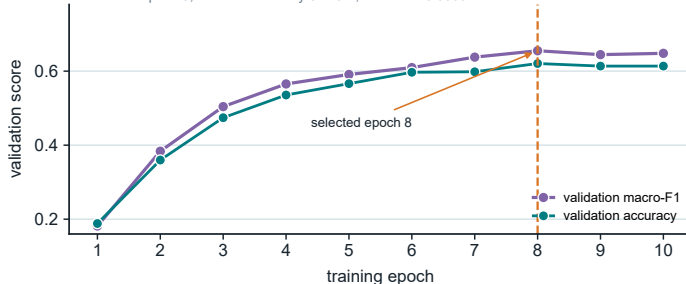

e Rare and mixed root states remain visible

Point area reports class support; no author class is omitted

f Selection precedes the locked test

Selected at epoch 8; held-out accuracy 62.25%; macro-F1 0.6660

g Interpretation guardrail

This panel does not substitute an independent species-validation experiment

One public study with supervised adaptation: report the gain as a conditional module, not a universal transfer result.
